

Outcome	Application of Critical Thinking Skills	Students will use critical thinking and a scientific approach to identify, evaluate, and/or solve issues pertinent to the field of forensic psychology, which include but are not limited to personnel selection, group behavior, training, global security, norm-violating behaviors, and the way in which the legal system operates and impacts individuals. May include forensic assessment strategies, including interviews and observations.
Outcome	Application of Professional and Legal Regulations	Students will demonstrate the ability to apply guidelines and standards of the profession to communicate information about psychological processes in various forensic settings.
Outcome	Application of Psychological Theory	Students will demonstrate knowledge of theoretical foundations of psychology in general and of "psychology and the law" specifically.
Outcome	Application of Research Skills	Students will demonstrate the ability to understand and apply basic research methods, including research design and data analysis, evaluation, and interpretation, to understand, evaluate, and predict human interaction in civil and criminal contexts and solve organizational or industry-specific problems.. Using these skills, students will demonstrate their ability to draw appropriate conclusions from quantitative and qualitative data analysis.
Outcome	Appreciation of Diversity and Multicultural Issues	Students will demonstrate an appreciation of contextual influences on individual and group behavior and diversity of perspectives, including those related to race, class, gender, sexuality, disability, nationality, and culture, when evaluating and intervening with forensic psychology populations.
Outcome	Communication Proficiency	Communicate effectively through oral and written presentations generally and within professional settings specifically.
Outcome	Team Work Proficiency	Students will demonstrate the ability to make positive contributions and function on multi-disciplinary teams generally and within forensic settings specifically.
Outcome	Technological Proficiency	Students will demonstrate the ability to use technology for many purposes, but specifically for use in various forensic settings.
